# Subscriber Notes

#### Platts to change frequency, specifications for Turkish CFR billet assessment

Platts, part of S&P Global Commodity Insights, will increase the frequency of its CFR Turkey steel billet assessment (SB01040) to daily from the current monthly frequency, effective Oct. 2, 2023, to better reflect the current market conditions following a change in international trade flows.

Platts first proposed these changes on Aug. 8: https://www.spglobal.com/commodityinsights/en/ our-methodology/subscriber-notes/080823-plattsproposes-to-change-to-frequency-specifications-forturkish-cfr-billet-assessment

Feedback gathered from market participants indicated an increasing demand for higher frequency price assessments, in order to present a more timely reflection of changing market conditions for the Turkish billet market.

In addition, Platts will update the assessments guality and timing specifications to reflect the most current and commonly traded parameters.

# Platts to change China HRC assessment specifications

Platts, part of S&P Global Commodity Insights, will change the specifications of some of its China HRC assessments, effective Sept. 18.

The change will better reflect current market conditions and will expand collection points of market data based on recent feedback gathered from the market.

The revisions include quality and/or dimensions specifications for HRC Ex-stock Shanghai, HRC FOB China SS400 and HRC FOB China SAE1006.

Platts is additionally widening the location basis for HRC FOB China SAE1006, from Tianjin ports currently to Tianjin, Jingtang, Caofeidian and Bayuquan ports, reflecting the bulk of SAE1006 data observed from northern China ports.

Details regarding the changes can be found in the table below:
